USING ADVANCED FEATURES 20

ABOUT YOUR PHONE

The MITEL NETWORKS 5220IP phone has ten fixed-function keys
(**SUPERKEY, TRANS/CONF, REDIAL, MESSAGE, HOLD, CANCEL,
SPEAKER, MICROPHONE,** ⬤, ⬤), three softkeys, and 14 personal keys
with built-in status indicators. The personal key on the bottom right is
always your Prime Line; the remaining personal keys can be programmed
as:

- Feature keys (for example, Swap). You can program feature keys from
  your phone or using the Desktop Tool. Your administrator can also
  program feature keys.
- Speed Call keys. You can program speed call keys from your phone, or
  using the Desktop Tool.
- Line Appearances. Only the administrator can program line appearances.

Note: For more information on the Desktop Tool, talk to your system
administrator.

Your phone also features display-assisted selection of features, on-hook
dialing, and a large Message Indicator.

Note: When using the **SuperKey**, press **Cancel** to back up one menu level.

Using the 5220 IP Phone in Remote Mode

Remote Mode allows the 5220 IP Phone to be used in the home or in other locations away from the office. For information on how to program the 5220 IP Phone for remote operation, refer to the *Remote IP Phones Guide* available at www.mitel.com

About Feature Access Codes

Use of some features requires dialing access codes. The codes are flexible and may be different than those in this guide. Ask your Administrator for a list of codes you should use.

For Users on Resilient 3300 ICP Systems

If during a call, you hear two beeps repeated every 20 seconds it means that your phone is switching to a secondary 3300 ICP system. The call continues but the keys and features on your phone stop working. The keys and most features begin working again after you hang up. Normal operation resumes when your phone switches back to the primary system. If your phone is idle and switched to the secondary system, you'll see a flashing rectangle on the display. The rectangle remains until the switch to the primary system is complete.

TIPS FOR YOUR COMFORT AND SAFETY

Don't cradle the handset!

Prolonged use of the handset can lead to neck, shoulder, or back discomfort, especially if you cradle the handset between your ear and shoulder. If you use your phone a lot, you may find it more comfortable to use a headset. See the section on headset usage elsewhere in this guide for more information.

Protect your hearing

Your phone has a control for adjusting the volume of the handset receiver or headset. Because continuous exposure to loud sounds can contribute to hearing loss, keep the volume at a moderate level.

Adjusting the viewing angle

The stand built into your phone tilts to give you a better view of the keys.

To tilt your phone for better viewing:

1. Press the release tabs on thes sides of the stand.
2. Hinge the two front hooks and snap the two back hooks of the stand into either the upper or lower notches on the back of the phone.

Group Paging / Meet Me Answer

Group Paging allows you to page a group of phones through their built-in speakers. You can belong to to as many as three paging groups with one group designated as your "prime" group.

When you need to respond to a Group Page but don't know the identity or extension number of the paging party, use the Meet Me Answer feature. You have up to 15 minutes after receiving the page to use Meet Me Answer.

To make a Group Page:

1. Lift the handset.
2. Press **Direct Page** or dial ***37**.
3. Do one of the following:
   - To page your prime page group, press **#**.
   - To page a specific page group, dial the page group directory number.
4. Speak to the dialed party after the tone.

To respond to a Group Page by using Meet Me Answer:

2. Dial ***88**.
3. Do one of the following:
   - To respond to a page from your prime page group, press **#**.
   - To respond to a page from a specific page group, dial the page group directory number.

Trunk Flash

The Trunk Flash feature allows you to access Centrex features (if available) while you are talking on an outside call.

To flash a trunk while talking on an outside call:

1. Press **TRANS/CONF**.
2. Dial ***57** for a single flash or ***56** for a double flash.
3. Wait for dial tone.
4. Dial the Centrex feature access code.

Record a Call

This feature uses your voice mail system to record your phone conversations.

Note: You may be required by law to inform the other party that you are recording the conversation. For specific instructions, consult your system administrator.

To start recording while on a two-party call:
- Press the **Record Call** key. (See *Feature Keys* elsewhere in this guide for instructions on programming a **Record Call** key to your phone.)

Note: Your system may be programmed to automatically begin recording external calls when you or the other answers.

To pause recording:
- Press the **Pause** softkey.

To resume recording after pausing:
- Press the **Resume** softkey.

To stop a recording without saving it:
- Press the **Stop&Erase** softkey.

To stop and save a recording:
- Press the **Stop&Save** softkey.

Putting the call on hold saves the recording; taking the call off hold starts a new recording. Depending on system programming, hanging up, or pressing **TRANS/CONF** or a **DSS** key, may also save the recording.

To listen to a recording:
1. Lift the handset.
2. Access your voice mailbox.
3. Follow the prompts to retrieve the recording.

Hot Desking

Hot Desking allows you to log into the telephone system from any phone designated as a Hot Desk phone. Simply log in at the phone using your assigned Hot Desk User Extension Number and the phone immediately assumes all your speed dials, features keys, call forwarding setup, and line appearances - even your language preference for the display. Any changes you make to the phone while you are logged in--for example, adding a speed dial--are saved to your personal profile. Logging in activates your profile on any phone that supports Hot Desking.

Note: All Hot Desking profiles have 13 programmable keys. If you log into a phone that has a fewer number of keys, the extra ones are "hidden". Only the use of the extra keys is lost, not the features assigned to them.

To log into a Hot Desking phone (the phone must be idle):
1. Press the **HotDesk** softkey.
2. Press the **Login** softkey.
3. Enter your Hot Desk User Extension Number
4. Press the **OK** softkey.

To log out of Hot Desking phone (the phone must be idle):
1. Press the **HotDesk** softkey.
2. Press the **Logout** softkey.
3. Press the **Confirm** sofkey.

Note: Your profile can only be active on one phone at a time. If you log in from another phone without logging out from the first one, the system will automatically deactivate your profile on the first phone.

Hot Desk Remote Logout

A user that has forgotten to log out of a Hot Desking phone can be logged out using any phone that supports Hot Desk Remote Logout.

To remotely log out a Hot Desking phone:
1. Dial **111**.
2. Dial the Hot Desk User Extension Number that you want to log out.

Tag Call

Tag Call allows you to signal that you are the victim of a threatening or malicious call. Using the tag, your system administrator or telephone company can identify the source of the call and provide this information to appropriate personnel or authorities.

CAUTION: Tagging a non-malicious call may result in fines or other penalties.

To tag a malicious call:

- Press the **Tag Call** feature key while the call is in progress.
  See "Feature Keys" elsewhere in this guide for information on programming a Tag Call feature key to your phone.
  -OR-
- Press **TRANS/CONF.**
- Dial ***55**.

If the call was successfully tagged "Thank You" is shown on the display; otherwise, "Not Allowed" is displayed.

Note: Tag Call can be used on active two-party calls only. Calls on hold and conference calls cannot be tagged.

USING THE LINE INTERFACE MODULE

5220 IP Phones (Dual Mode) support the Mitel Line Interface Module (LIM). The LIM allows you to make and receive calls over an analog line (referred to as the LIM line) connected to your phone, and operates in either of the following two modes (as determined by your System Administrator):

- LIM Mode, where your phone allows you to use the LIM line at any time.
- Failover Mode, where you can use the LIM line only when the IP connection has failed.

Note: Handsfree and on-hook dialing are not supported on the LIM line.

LIM MODE

Make a Call

To make a call using the LIM line:

1. Lift the handset.
2. Press the **LIM** key. ANALOG CALL appears on the display.
3. Dial the number. The call is made.

Notes:

- When making external calls over the LIM line, a prefix (e.g. 9) is not required.
- If your phone's LIM key has the Privacy option enabled, you cannot access the LIM line when another phone is on a call using the LIM line (the LIM key is solid orange). To access the LIM line, the user of the other phone must first hang up. To determine whether the Privacy option is enabled, contact your System Administrator.

Answer a Call

To answer a call using the LIM line:

1. Lift the handset.
2. Press the flashing **LIM** key. ANALOG CALL appears on the display.

Answer a Waiting Call on the LIM Line

If you have subscribed to an analog call waiting service, you may use the hookswitch or press **CANCEL** to answer a waiting LIM call. When you are on a LIM call and a waiting LIM call arrives, you will hear a beep.

Note: This feature may not be supported in all regions.

To answer a waiting LIM call, or return to the original LIM call:

1. Do one of the following:
   - Press and release the hookswitch.
   - Press **CANCEL**.
2. Press the **LIM** key.

Using Hold

To put a current call on hold to answer an incoming LIM call:

- Press the flashing **LIM** key. The current call is put on hold.

To switch between the current call and the held call when one of the calls is using the LIM line, do one of the following:

- If your current call is using the LIM line, press the flashing Line key of the held call. The LIM call is automatically put on hold.
- If your current call is using an IP line, press the flashing **LIM** key. The IP line is automatically put on hold.

End a Call

To end a current call when an incoming LIM call arrives:

- Press **CANCEL**, and then press the flashing **LIM** key. The current call ends, and you are connected to the caller on the LIM line.

To end the current LIM call when an incoming call arrives:

- Press **CANCEL**. The current LIM call ends, and you are connected to the new caller.

FAILOVER MODE

EMERGENCY CALLS

WARNING FOR EMERGENCY NUMBER DIALING: Consult your local authorities for Emergency Numbers and 911 or equivalent service availability in your area. **Emergency Number dialing should only be performed by picking up the handset and selecting the LIM key.** If Privacy Mode is enabled and the LIM key local line is busy, dialing will not occur on the LIM line. Emergency dialing using an IP connection may not be supported due to ICP system configuration and country location. For more information, contact your System Administrator.

You can make an Emergency Call to your Local Emergency Service using the LIM line when the IP connection has failed.

To make an Emergency Call using the LIM line:

1. Lift the handset.
2. Press the **LIM** key.
3. Dial your Local Emergency Number. ANALOG CALL appears on the display.
